Buy good companies. Don't overpay. Do nothing. Some people love to make successful investing seem more complicated than it really is. In this anthology of essays and letters written between 2010–20, leading fund manager Terry Smith delights in debunking the many myths of investing and making the case for simply buying the best companies in the world. These are businesses that generate serious amounts of cash and know what to do with it. The result is a powerful compounding of returns that is almost impossible to beat. Even better, they aren't going anywhere. Most have survived the Great Depression and two world wars. With his trademark razor-sharp wit, Smith not only reveals what these high-quality companies really look like and where to find them (as well as how to discover impostors), but also: - why you should avoid companies that abuse the English language - how most share buybacks actually destroy value - what investors can learn from the Tour de France - why ETFs are much riskier than most realise - how ESG investors often end up with investments that are far from green or ethical - his ten golden rules for investment - and much, much more. Backed up by the analytical rigour that made his name with the cult classic, Accounting for Growth (1992), the result is a hugely enjoyable and eye-opening tour through some of the most important topics in the world of investing - as well as a treasure trove of practical insights on how to make your money work for you. No investor's bookshelf is complete without it.

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don’t make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life’s most important topics.

Every book is written with a certain reader in mind, and this book is no different: You may have some investments, but you're looking to develop a full-scale investment plan. You'd like to strengthen your portfolio. You want to evaluate your investment advisor's advice. You have a company-sponsored investment plan, like a 401(k), and you're looking to make some decisions or roll it over into a new plan. If one or more of these descriptions sound familiar, you've come to the right place.

Kids will always be kids. They want to play, run to the fields, watch their favorite cartoons and do fun stuff. But most of all they are curious. They love to ask many
questions, of how and why things happen. So why not take the opportunity and tell them about financial literacy? Adults are afraid that if they teach so much to a kid at a
young age, they will not get their interest. But kids are developing mentally, and are having interesting thoughts. Give them lessons about a business they can start, and
let them do some enterprising and investment. You could even teach them about the rich and poor mindset. Eventually, when they became teens and grown ups, they will
earn their own money, and they might even dream to be an entrepreneur and start a business. Remember that teaching them while they are young can make a great
impact while they are growing. Share them the steps and takeaways to reach success. Studies show that the earlier the children were introduced to money and saving,
the more likely they will be good at budgeting when they grow up. With this book, you will get ideas on how you can teach your kids to save, invest and budget their own
money in an entertaining way.

The manager of a top investment fund discusses how individuals can make a killing in the market through research and investment techniques that confound
conventional market wisdom.

Mutual-fund superstar Peter Lynch and author John Rothchild explain the basic principles of the stock market and business in an investing guide that will enlighten and
entertain anyone who is high-school age or older. Many investors, including some with substantial portfolios, have only the sketchiest idea of how the stock market works.
The reason, say Lynch and Rothchild, is that the basics of investing—the fundamentals of our economic system and what they have to do with the stock market—aren’t
taught in school. At a time when individuals have to make important decisions about saving for college and 401(k) retirement funds, this failure to provide a basic
education in investing can have tragic consequences. For those who know what to look for, investment opportunities are everywhere. The average high-school student is
familiar with Nike, Reebok, McDonald’s, the Gap, and the Body Shop. Nearly every teenager in America drinks Coke or Pepsi, but only a very few own shares in either
company or even understand how to buy them. Every student studies American history, but few realize that our country was settled by European colonists financed by
public companies in England and Holland—and the basic principles behind public companies haven’t changed in more than three hundred years. In Learn to Earn, Lynch
and Rothchild explain in a style accessible to anyone who is high-school age or older how to read a stock table in the daily newspaper, how to understand a company
annual report, and why everyone should pay attention to the stock market. They explain not only how to invest, but also how to think like an investor.
